

WHITE PAPER

INTRODUCTION & OVERVIEW

XTL Token, your premier destination for cutting-edge cryptocurrency trading solutions. Established in the vibrant city of Dubai, XTL Token stands at the forefront of innovation in the realm of digital assets, leveraging the power of Binance technology to provide unparalleled trading experiences to our global clientele.

At XTL Token, we understand the dynamic nature of the cryptocurrency market and the evolving needs of traders worldwide. Our platform is meticulously crafted to offer seamless access to a diverse range of digital currencies available on the Binance exchange.

XTL TOKEN

XTL TOKEN, including but not limited to the overall project, Coin, website, smart contracts and any apps XTL TOKEN as presented in this conceptual paper is not an licensed, unlicensed or exempted financial or payment service of any kind and in any jurisdiction. Any terminology used in this Whitepaper, on the Website or within the app is intended only as a basic reference, without any active or legal meaning of the same terms in a regulated and/or financial environment. XTL TOKEN is a decentralised and community driven project and not have owners, shareholders, promoters, marketers, manages, directors or other figures or entities exerting any form of governance. The XTL TOKEN smart contracts are open source, security audited, permanent and non-modifiable in any way.

The XTL TOKEN is strictly a utility Coin in all jurisdictions and it isn't and cannot be considered as a "security" or otherwise regulated Coin of any kind. XTL TOKEN is not in any way e-money and/or fiat, or an asset backed stable Coin, whether global or limited in scope. This Whitepaper taken by itself is not a contract or a contractual agreement of any kind, it isn't an invitation, a solicitation or an offer to invest in XTL TOKEN or acquire or use XTL TOKEN in any way and with any expectation of profit.

Any user of XTL TOKEN declares to have received appropriate technical, administrative, regulatory and legal advice before and a after accessing and/or reading this whitepaper or the website, and/or using any portion or element of XTL TOKEN (including XTL TOKEN). The user hereby acknowledges and accepts that there is an inherent high risk in accessing, acquiring or using any kind of blockchain and/or crypto system, Coin, platform, software or interface, including XTL TOKEN, and further acknowledges with this disclaimer for any claim of any kind against any community member directly or indirectly involved with XTL TOKEN, for any damage suffered, including total loss. XTL TOKEN makes a credit card interface available on its website exclusively for the convenience of the users. The Company is not a payment processor of any kind, and has no control over credit card processing. Use at your own risk.

XTL TOKEN

PURPOSE OF THIS PAPER

The XTL TOKEN is made up of a number of protocols and innovations. It's important to have clear documentation and technical specifications on key protocol design and implementations - for which we utilize an XTL TOKEN . However, we feel it's equally important that we help our communities to understand what we try to accomplish, the trade-offs we have made, and how we have arrived at our current decisions.

We start this document with a detailed examination of the problems that public permissionless blockchains/Coins face today and the existing solutions attempting to solve them. We hope this provides the necessary context for our readers to understand our own rationale on how best to approach these challenges, and our underlying design decisions. We then provide a high-level walkthrough of all parts of the XTL TOKEN , with a focus on how they work together to support the overall vision of the network.

Scalability, sustainability and interoperability are among the largest challenges public permissionless blockchains/Coins face today. While many projects claim to have solutions to these problems, it's important to understand where these problems come from and put solutions in the context of possible trade-offs.

INTRODUCTION

Market Background

The blockchain is an incorruptible digital ledger of economic transactions that can be programmed to record not just financial transactions but virtually everything of value. Financial and technology industries alike are combining wonderfully, giving rise to the birth of blockchain outside of its normal working conditions. Blockchain is a distributed digital ledger designed to power and back cryptocurrencies.

Cryptocurrencies have been the top performing asset class over the last decade with its total market capitalization growing from around \$1.7 Billion in 2013 to where it stands now at \$ 1.7 Trillion. Recent months have witnessed global institutional investors – pension, hedge and endowment funds, which historically invest in diverse asset classes including stocks, commodities and real estate – invest in cryptocurrencies to diversify their investment portfolios and spread their risk.

XTL TOKEN

CRYPTO CURRENCY MINING

Cryptocurrency mining—or crypto mining—

is the method of verifying transactions on a digital ledger for a **blockchain** using machines with extensive computing power. Cryptocurrency mining is something any individual or organization can do with adequate **hardware** and **software** resources, but the expansion of mining and increasing costs make it progressively difficult for newcomers.

This article looks at **cryptocurrency** mining, how it works, the best mining apps, and whether it's a profitable business model in 2022.

Cryptocurrency mining is the process where specialized **computers**, also known as nodes or mining rigs, validate blockchain transactions for a specific cryptoCoin and, in turn, receive a mining reward for their computational effort.

Launch Own Blockchain

THE VEHICLE FOR MINING: NODES, RIGS, AND POOLS

Blockchains require an expansive network of machines to verify and store transactions to support global cryptocurrencies' overarching distributed digital ledgers. Rigs use the latest processors (e.g., GPU , FPGA , or) ASIC and do little else but serve as a node for the blockchain's network. Using standard personal computers for mining is not advisable as most lack the computational power to handle mining-level processing.

With a fleet of nodes or a pool, a group of individual miners can combine computational effort, dubbed hash rates, to win block rewards and split the earnings according to contribution.

ACHIEVING CONSENSUS THROUGH PROOF-OF-WORK

Blockchains require a protocol for achieving a decentralized consensus to verify the integrity of new blocks, and in crypto mining, this consensus mechanism is proof-of-work (PoW). By contributing computational effort to validating transactions, miners receive a predetermined amount of the Coin for their proof of work.

The protocol ensures the integrity of blockchain transactions and rewards miners for their expenses and effort, but it also deters threat actors hoping to manipulate the cryptocurrency. Crypto mining requires extensive processor power, creating competition and a barrier to entry for prospective nodes and mining rigs.

XTL TOKEN

CRYPTO CURRENCY CLOUD MINING

Cloud Mining is the process of cryptocurrency mining utilizing a remote datacenter with shared processing power. This type of cloud mining enables users to mine bitCoins or alternative cryptocurrencies without managing the hardware. The mining rigs are housed and maintained in a facility owned by mining company and the customer simply needs to register and purchase mining contracts or shares. Since cloud mining is provided as a service, there is generally some cost and this can result in lower returns for the miner.

DECENTRALIZATION

One of the largest long-term threats public blockchains/Coins face is an ever-increasing barrier of independent participation and transaction verification, reflected in the cost of full node operation. Full nodes allow blockchain participants to independently verify the on-chain state/history, and hold miners or validators of the network accountable by refusing to route invalid blocks. As the cost of full nodes increases and their numbers decline, participants in the network are increasingly forced to rely on professional service operators to provide both history and current state, eroding the fundamental trust model of open and permissionless blockchains.

For a full node to keep up with the progression of the blockchain, it must have adequate computational throughput to validate transactions, bandwidth throughput to receive transactions, and storage capacity to store the entire global state. To control a full node's operating cost, the protocol has to take measures to bound the throughput or capacity growth of all three of these resources. Most blockchain protocols bound their computational or bandwidth throughput, but very few bound the growth of the global state. As these chains grow in size and length of operation, full node operation costs will irreversibly increase.

XTL TOKEN

PROBLEMS

Some of the critical issues facing cryptocurrency usage and XTL TOKEN adoption are the lack of a simplified way to send and receive money (using crypto), lending and borrowing (BEP-20) and staking (the new way of mining).

Remittances

The cost of transferring funds through banks and currently known money remittance services is very high, it also takes 3 - 5 working days for the intended recipient to get the funds, this long delay comes at a cost.

With superior and tested technology (XTL TOKEN technology), users will be able to send money across the world with high speed and lower cost and almost no cost using the Binfin platform.

Security

Security is a crucial aspect of any exchange platform, given the rising levels of hacking activities targeted at exchanges in recent times. XTL TOKEN is built to a high standard to ensure that the security of our users come first.

We have carried out a security assessment on our internal server, testing for external penetration and we've also consulted an external security firm to conduct a thorough external security test and full threat modeling exercise to ensure the completeness of their security controls.

XTL TOKEN

LACK OF AUTOMATED PROCESS

The lack of automated processes on several exchanges can be frustrating for users who intend to explore value-added services. With numerous applications and the high volume of data, the room for manual human errors is also bigger. **MAD** solves this problem by automating manual data entry tasks which in turn leads to higher productivity and no manual errors whatsoever.

Our automated process will create more transparency, drive efficiency, and facilitate process compliance.

The other challenges posed by decentralized exchanges are as follows:

In order to cope with this business context: Our vision is to develop a trustless XTL TOKEN for the BEP-20 ecosystem. The project envisages the development of a truly decentralized exchange network in a trustless environment with lightning-fast transaction speed to support BEP-20 and cross-chain Coins communications. We have created that encourage features users to the platform that

primarily to draw basic to day traders and institutional investors who prefer cost reduced convenience, speed and efficiency in execution

XTL TOKEN

XTL TOKEN LIQUIDITY POOL

Adequate liquidity is essential to the successful operation of BEP-20 services. A lack of liquidity causes significant challenges to users. Prices in decentralized trading become extremely volatile. Interest rates available for loans fluctuate sharply. Lenders may be unable to withdraw their assets.

Some BEP-20 protocols have addressed liquidity by allowing users to pool their liquidity. However, these liquidity pools remain distinct from lending and staking. **XTL TOKEN** will be the first to integrate liquidity pools, lending services, and staking services to maximize the liquidity accessible to the user.

Any investor will be able to deposit their idle assets into a liquidity pool and earn a reward on their allocated assets. Rewards will vary based on how the liquidity is utilized. There are several possible means by which the assets can deepen the liquidity of the integrated services:

Prevent illiquidity events. Many lenders seeking to withdraw their assets simultaneously can oftentimes lead to insufficient assets for withdrawal. This has happened several times on the largest BEP-20 protocol Compound.

XTL TOKEN

XTL TOKEN CRYPTO CURRENCY

XTL TOKEN is a 100% community governed, decentralized cryptocurrency that launched in November 2021. Our missions are chosen by the community! They're my family and our team, they draw on expertise from all around the world and the goal is to make our family one of the most creative, innovative and largest cryptocurrency projects in the universe. We have created a BEP-20 protocol, which is the beginning of our BEP-20 ecosystem. This ecosystem will serve as a central point for a host of BEP-20 products and applications that will allow investors to add to their wealth generating abilities, grow their portfolios and experience BEP-20 in a user-friendly system. As our family grows in members and value, it is our priority to always give back to underserved communities around the world. I'm extremely proud to have my community participate in the governance of my Coin, all initiatives are executed through expertly drafted proposals and a secure voting process, that ensures the best decisions are formulated for the ensured growth of the Coin. Join one of the most vibrant crypto projects you'll ever see! A place where the project starts with you - the community.

XTL TOKEN

MORE ABOUT XTL TOKEN

Vision

Transparency and integrity are the cornerstones of our ethos. We operate with full transparency, providing real-time market data, comprehensive analytics, and insightful resources to empower informed decision-making. Additionally, our dedicated customer support team is available around the clock to assist you with any inquiries or concerns, ensuring a seamless trading experience from start to finish.

Mission

“ Our commitment to security is unwavering. We prioritize the protection of our users' assets through robust security protocols and state-of-the-art encryption technologies. With XTL Token, you can trade with peace of mind, knowing that your investments are safeguarded against potential threats. “

XTL TOKEN

CORE VALUES

Commitment

We want every user to participate with XTL TOKEN , by way of utilizing and integrating XTL TOKEN with the various financial services. It is our commitment to being clear, consistently remains committed to the project to develop relationships that make a positive difference in our customer's lives.

Integrity

To be a transparent hub for users to interact and work together. We aim to make the BEP-20 market better as a whole, incorporating high standards of honesty and strong moral principles, doing the right thing all the time with no exemption.

Inspire

The community of XTL TOKEN holders helps create the value and relevance of the Coin. The business we are building on XTL TOKEN and cryptocurrency provides a huge opportunity for growth and expansion for the various industries supporting entertainment. This is the way, XTL TOKEN revolutionize and evolve with the ever-changing demands of the consumers' world.

XTL TOKEN

OBJECTIVES

Disintermediation

We aim to reduce the need for trusted intermediaries while increasing security, removing time and cost bottlenecks.

Connecting Businesses

By integrating a single API that makes money move faster, cheaper and more reliable for you and your customers.

Global Reach

Our goal is to become the standard for seamless digital transactions and accessing financial services on a global scale and across borders.

XTL TOKEN

KEY BENEFITS OF XTL TOKEN

XTL TOKEN platform is a unique, decentralized, robust, and secure platform for BEP-20 applications. It aims to provide a completely secured BEP-20 services that brings revolutionary in the financial ecosystem. Specifically,

XTL TOKEN Will be a Multi-level financial ecosystem A reliable and secured payment method Establish a new Coin-based economy Transactions low fees, high speeds and easy access. Access to your money anytime, anywhere and get rewarded Asset's Coinization (gaming, real estate, education, etc.)

XTL TOKEN continues to be a strong platform through its more amazing benefits: Decentralized Smart contract that works on self- execution of technical functionalities with no admin interference. Verified marketing strategy through XTL TOKEN which is immutable and can't be changed or altered. Complex systems and procedures made easy to on-ramp both entry-level and advanced users.

XTL TOKEN

MARKET ANALYSIS

With the enormous development of the **XTL TOKEN** technology, new opportunities are arising in the field of investing. Crypto markets are borderless, open 24/7, and OFFER huge potential for growth. A rapidly growing number of initial Coin offerings (ICO) has led to more than 2,000 new cryptocurrencies being created and traded on daily basis, leading to high returns for many investors. In order to fully realize market potential, here is the market capitalization of the top technologybased companies listed on the Nasdaq and NYSE, compared to the market capitalization of cryptocurrencies: with no exemption.

Decentralized Finance (BEP-20):

An Emerging Giant

In 2020, the growth of BEP-20 took the crypto world by storm. In fact, Total Value Locked (TVL) – a measure of BEP-20 transaction value – grew by 14x in 2020. And already in 2021, TVL has more than doubled to a total value of \$37.67 billion.

XTL TOKEN

XTL TOKEN PLATFORM

XTL TOKEN is the official currency of XTL TOKEN NETWORKS. It serves as an integral part of all the transactions and processes within the XTL TOKEN ecosystem. The ecosystem is expected to grow relentlessly due to BEP-20 developments on the XTL TOKEN network. It will be utilized in an open-source network generated through decentralized smart contracts on the BSC. XTL TOKEN is world's top dAPP that is build on exceptional XTL TOKEN BEP-20 experience. XTL TOKEN is an exclusive Coin for various protocols in BSC ecosystem that can be earned through trading and participating in campaigns.

XTL TOKEN

XTL TOKEN TECHNOLOGY

XTL TOKEN uses tested technologies integrated in a concise and easy-to-use platform. Content Distribution Tech - Content distribution software disseminates content to online audiences across a variety of communication channels, such as social networks, paid search, websites, blogs, email, and more. These tools are used by content marketing teams to expand their audience reach and increase content visibility.

This technology is being used by major companies and has already successfully delivered hundreds of millions of applications downloads.

Some Key Features:-

- Automatic application updates
- Automatic error recovery
- Last-mile acceleration
- Redundant delivery
- network Multi-platform
- Download permission management

Ad Tech - Ad tech is an umbrella term that describes systems of analyzing and managing tools for programmatic advertising campaigns. It has plenty of moving parts, which means there are countless opportunities for agencies to set themselves apart.

XTL TOKEN

AD TECH OPERATION

The basic objectives of Ad Tech operation look like this: User activity and behavior on site is being monitored Enable content publishers to promote their products more efficiently Adapts to incoming information and collects the cream of the crop. Allow users to effortlessly earn XTL TOKEN s by opting into the XTL TOKEN Ads revenue share program

XTL TOKEN PROTOCOL

XTL TOKEN Protocol is based on the BEP-20 Chain the next generation XTL TOKEN BEP-20 developed by BSC to develop an ecosystem of decentralized applications, NFTs and digital assets. This dual-chain architecture will empower its users to build their decentralized apps and digital assets on one XTL TOKEN and take advantage of the fast trading to exchange on the other.

XTL TOKEN

DEFLATIONARY PRICE INCREASE

XTL TOKEN are long-term deflationary. Emissions have a hardcap and are continuing to decrease, while burn is permanent and continuing to increase, and we burn quite a bit of Coins; A significant portion of protocol fees go towards Coin burn: 80% of all liquidation fees and 10% of all protocol lending interest earned by lenders. So as XTL TOKEN Finance continues growing, more XTL TOKEN will be burnt, leading to the value of each remaining XTL TOKEN rising continuously and permanently.

GOVERNANCE

We will soon launch a governance vault that will allow community members to stake their XTL TOKEN ; stakers will receive x XTL TOKEN where $1 \text{ XTL TOKEN} = 1 \text{ vote}$, allowing them to decide on key governance decisions.

XTL TOKEN

The XTL TOKEN holders are invited to carry out a comprehensive evaluation of the company to comprehend the current or future values of XTL TOKEN s obtained by them. No element of the white paper should be considered as a prospectus of any kind or as a solicitation or offer to purchase some securities within any jurisdiction. The development of this document did not occur as per the regulations which are purported to protect the rights of investors, and hence, this paper cannot be subjected to any such laws from any such jurisdiction

It should be noted that there are certain estimates, statements and financial information within the paper which reflect that as a result of some known and unknown uncertainties, the results implied in the paper may not completely match with the actual results or events. The future events that have been proposed in the white paper should not be considered as a guaranteed forecast or a surety of profit with XTL TOKEN s.

This white paper presented in the English Language is the preliminary source of information in the context of the XTL TOKEN and its Coin launch. The information presented in the paper may get translated from time to time into other languages customers, etc. During the process of such translations, the information provided in this white paper may get lost, become corrupted or get misinterpreted.
